

solaiemes

Solaiemes unveils mobile solutions using 3G Video-sharing enabled handsets and their ConverG + Liveserve products. 15/01/07.

Solaiemes unveils the first LiveServe mobile solutions. LiveServe is the brand to define our SIP/IMS solutions based on VideoSharing (combinational serviced) to deliver real time video/data to the enterprise process of reporting, documenting and supporting the decision taking. The first LiveServe front end is customized for law & reinforcement purpose allowing to receive live streams from field, storing them and real time displaying of several incoming video streams simultaneously.

The access technology is 3G videosharing enabled handsets or pc with wi-fi coverage and webcam/softphone and the desktop LiveServe solution could have any broadband connectivity and run over Windows or Linux. This solutions allows to law and reinforcement corps to have multimedia information where bandwidth limitation of private voice networks (TETRA) make impossible the video to help the decision taking.

Soon to be announced more front-end customized use cases of LiveServe.
