

Solaiemes showcases its innovation at Homeland Security 2008 Trade Fair (HomSec). 1/December/2008.

Madrid, December the 1st, 2008. Solaiemes will be showcasing its innovation in mobile user generated content technology (LiveServe & VoxServe) applied to homeland security and emergency cases at HomSec, the International Homeland Security Trade Fair to be hold in Madrid, 1-4th December.

One of the main field application of Solaiemes platform is the law enforcement IT systems. Our LiveServe and VoxServe platforms allow police corps and emergency forces, record and live stream in central headquarters live media (video and audio from field) in order to help in decision taking processes. Mid tier mobiles become powerful emergency / police tools to track incidents and help the decision taking on real time complete information basis.

VideoShare/VideoCall and Push to Talk features will improve real time coordination of emergencies/police staff. We are glad to have the opportunity to be in contact with Police and Emergencies Managers and receive feedback about new requirements and spaces to trial live mobility applied to security.

About Homsec 2008.

HomSec is the point of reference in Spain in the fields of Security, Protection and Defense. Trade Fair specifically devoted to the application of technology for the Security and Protection of the National Territory and Society (Homeland Security). HomSec is open to manufacturing companies and product suppliers, systems and services derived from these technologies, and the research organisms that develop these. <http://www.homsec.es>

About Solaiemes.

Solaiemes is a mobility-focused technology company; with a value proposition strongly focused on creating innovative, new use cases for mobility, and increasing usability on the mobile side. Solaiemes leads the way in monetizing and getting the most from current data networks and mid-tier handsets, generating value for MNOs, enterprises, service providers and Web 2.0 communities. With Solaiemes technology concepts as m-CRM (customer relationship management), m-ERP (Enterprise Resource Planning), and m-UGG (user generated content in WEB 2.0) finally become feasible. www.solaiemes.com
