

NoteVault selects Solaiemes LiveServe MOBILE video for reporting on jobsite construction activities.

Madrid. 28/4/2009. Solaiemes today announced that NoteVault Inc., the leader in voice-to-text mobile reporting solutions for the construction industry, will integrate Solaiemes LiveServe technology into NoteVault's web-based project dashboard. NoteVault is a wireless service that enables construction superintendents to do their daily project reporting simply by speaking into their mobile phone. NoteVault instantly transcribes those notes into printable reports.

Solaiemes' mobile-to-enterprise LiveServe platform is a VideoShare-based solution with immediate applications for event reporting. Multimedia live task reporting saves money and increases efficiency to track processes, extract lessons learnt, and protect the company in the event of disputes.

"We are very excited to deploy Solaiemes' innovative technology," said Peter Lasensky, NoteVault's CEO and founder. "LiveServe enables our customers to hold scheduled or ad hock conference calls between disparate engineering and construction teams to simultaneously view live video of a project sent from a supervisors' mobile phone. This can help identify and solve problems in real-time, often without incurring a field visit or project delay. Furthermore, because the video is streaming from the mobile phone to a central server, customers do not need to worry about videos being 'out there' on supervisor's personal computers, which could suddenly appear during legal discovery and potentially damage their case."

"I am glad to cooperate with services companies innovating in processes and

quality project management as NoteVault is" said Chema Recio, Solaiemes VP and Co-Founder, "I think our technology and the NoteVault vision make a perfect match".

About NoteVault.

NoteVault is the leader in voice-to-text mobile reporting solutions for the construction industry. NoteVault enables superintendents to quickly and easily report project activity from the field using nothing but their voice and their mobile phone. This information is transcribed into daily reports and made available through email or a web-based interface. NoteVault was developed by construction industry veterans to save contractors time and money, while providing increased protection against potential lawsuits. Constructech Magazine recently named NoteVault as one of its top products for 2009 in the new products category. For more information, please visit www.notevault.com.
